

Municipal and Authority staff and officials have an overwhelming amount of responsibility: streets, parks, facilities, water/sewer, public assistance, planning, flooding, stormwater, grants, budgeting...your job never ends. Our job is to share in that responsibility—let us lighten your load. As your engineer of record, we develop a collaborative relationship with you to strategize on how to address your more “traditional” engineering needs—what you can budget and plan to accomplish from one year to the next. We proactively help you maintain your facilities and infrastructure to prevent expensive emergency repairs and to preserve your community’s safety and well-being. But when something does go wrong—we are also your first call: lean on our experts to help you respond quickly and effectively. Other times, we build relationships with our communities by serving as the “go-to” consultant specific to **special projects** or **traffic, CDBG, MS4, or recreational** needs. We are flexible. We can do it all for you—or you can pick and choose from our municipal service menu: either way, we deliver five star service.
